

THE LOCKDRY DEVICE

Keep the elements out

Benefits

- Blocks surface water, dirt, and debris from entering manholes
- Reduces waste treatment costs
- Sizes from 20" to 38"
- Stainless steel handle for easy drop in and lift out
- Neoprene compression gasket for water-tight seal with frame
- Optional gas detection port with self-sealing rubber grommet
- 16 gauge spun stainless steel construction- won't corrode, warp, or split
- Maintenance - free
- The LockDown security version available to protect against unauthorized entry

Stop water from entering your system through manhole covers.

A LockDry under the cover keeps water, dirt and debris out. Made from stainless steel, the LockDry is durable and resists deterioration. For security, the LockDown is available.
